

Pre Treatment Care for Waxing

Please follow the guidelines below. This applies for waxing on the face and body.

Please note: some slight soreness, small bumps and redness are common and perfectly normal temporary reactions, particularly if this is your first wax. These symptoms should subside over the next 24 - 48 hours. If you experience persistent redness or irritation, or if you have any questions, please do not hesitate to contact us.

Pre Wax Care:

Exfoliate 24-48hrs prior (do not wax on the same day).

Come with clean skin to your appointment

Stop using AHA's / Retinal atleast a week before your appointment. Especially for those having brow wax services.

Avoid sunbeds for 48hrs prior and after your wax

Immediately after your wax:

No hot baths or showers (cool to lukewarm water only).

No saunas, hot tubs, massage or steam treatments.

No tanning (sunbathing, sun beds or fake tans).

No sport, gym work or other exercise.

Avoid scratching or touching the treated area

Wear clean, loose fitting clothes.

Avoid swimming in chlorinated pools.

Do not apply deodorants, body sprays, powders, lotions, makeup or other products to the area, other than those recommended by your therapist for 24hrs.
